

## **Facilities List [Line or Corporate Office Name]**

The list of facilities specifies which facilities/locations have been assessed for export control regulatory requirements. A point of contact (POC) must be provided for each facility/location covered by the certification statement. This POC is the person responsible for the controlled technology assessment of the program/activity/location. The POC should be the same as the POC on the access control plan. Please use their common names to identify facilities.

Example:

NOAA Facility or Location Name

Program Name

Street Address (Physical Location, no P.O. Box)

City, State, Zip Code

POC: Name, Phone Number
